

Melody Woods Water Rate Sheet

7/2024

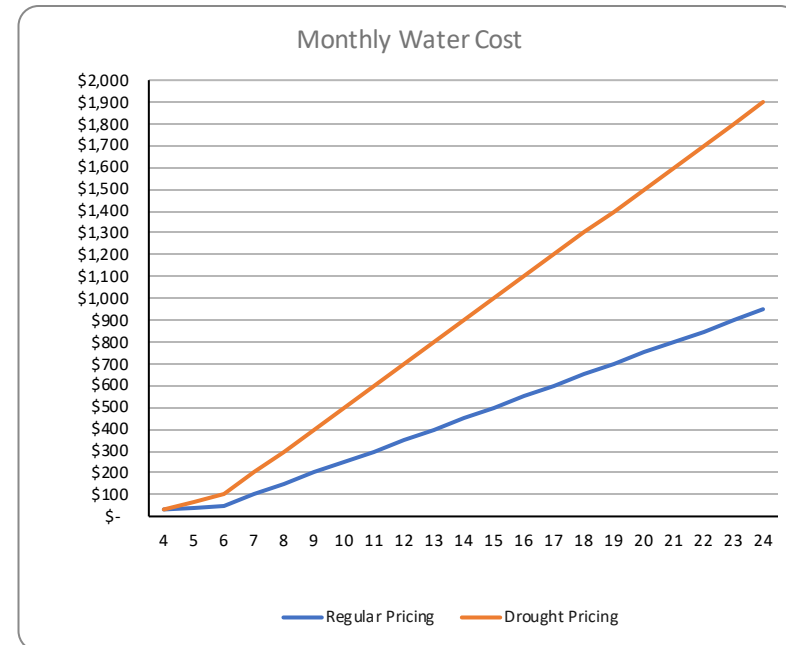

Melody Woods charges a \$30/month Assessment plus a variable rate for water used starting at \$32 for up to 4 units (3,000 gallons).

The price per unit of water increases the more water is used. To conserve our water resources, we encourage keeping consumption at 4 units (~3,000 gallons) per month average. Drought pricing takes effect when a drought is declared or when the Melody Woods water supply is low. With drought pricing, extra consumption gets expensive quickly!

Melody Woods is a Mutual Water Company; property owners are shareholders of the company. We keep our water costs low because we're a volunteer-run organization. Volunteer hours earn credits to offset your water bill!
